

Action plan based on the student feedback received in the 2nd semester of the 2020/2021 academic year

Department: Genetics Cell- and Immunobiology

Faculty: EM_ AOKGEN030_1A

Our feedback on general comments by the students:

The questionnaire was submitted by 83 of 174 students, several written comments were received.

Weaknesses: Based on K1 and K3-K5, the Department performed worse than the average of the Faculty, the students did not attend lectures and therefore did not consider it useful. Based on the on-spot feedback, those who were present were able to take advantage of the presentations

Proposal: Attendance at lectures is optional, we try to make it attractive by helping the students learn a difficult subject more easily. We plan to better involve students in lectures, and make them more interactive by question pools, and games to improve activity.

Strengthen: Based on K 6 and K10, the students were satisfied with the organization of the exams and the Department's educational discipline.

The general evaluation (K13) corresponds to the Faculty average.

Our feedback on specific comments on mandatory subjects:

1. *"It is somewhat embarrassing that my teacher didn't have a payed zoom account, so we had to re-log in every 40 minutes. Too much overlapping material with MCB, many topics weren't new at all"*

Proposal: We are developing our IT capacity.

2. *"I think some of the lectures were not that organized and concise, so some of them should be updated and be more clear". „The lecture and practicals are great. It would be very much appreciated if some lecturers could speed up their talk." „I want to say a good word about Nikollet she is a great teacher"*

Proposal: We modify the curriculum every year to make it as easy to learn as possible. We will further strengthen teacher training.

3. *„This subject was hard to dedicate effort, because it felt somewhat abundant and unnessecary. Im very happy about the system with midterms, extra points and competition. It really helps to be able to show the knowledge in advance of the exam period, to make more time for remaining exam"*

Proposal: We incorporate a bonus system and competition to increase student motivation.

4. *„It would be best if we could still have lectures online while practicals should be held off line in order to concentrate"*

Proposal: We plan to incorporate and develop the experience of online education

5. *"Please Download all the lectures and practicals and never delete them until the exam period finishes"*

Proposal: We are going to upload the Powerpoint presentations on time

6. *"I think this subject suffered a lot by going online."*

Proposal: We are prepared for an improved online presence.

Date: 02. 10. 2021
