

# Action plan based on the student feedback received in the II semester of the 2020/2021 academic year

**Department: Genetics , Cell- and Immunobiology**

**Faculty: EM Immunology**

**Our feedback on general comments by the students:** The feedback results for Immunology subject are the same as the faculty average, with slightly better non significant results for questions about the online education (DK1-DK6)

## **Our feedback on specific comments on mandatory subjects:**

- Among the recommendation of students it was asked to upload the voice completed version of practices. Answer: Till the end of the semester all practices were available in voice completed version.
- *„the midterms are too difficult“*. Answer: The success of the midterm is not a requirement to validate the semester, but based on their total scores, students receive bonus points. It acts as a competition in the sense that the best students can get plus points, without the limit of the number of students. (Which, in case of a real competition, is maximized by the Study and Examination Regulation up to 5% of the number of students.) Midterm tests help students master the examination routine, we do not plan to make these tasks easier.
- *„the lecture via zoom and the recordings of the lectures were great! this helps a lot to study properly and review the lectures! the consultation also were great via zoom since we have the option to review them“*. Answer: we are going to continue it in the future.

## **Our feedback on specific comments on elective subjects:**

Date:2021. 09. 28.
