

Action plan based on the student feedback received in the 1st semester of the 2021/2022 academic year

Department: Genetics , Cell- and Immunobiology

Faculty: ED Basic Immunology FOKOGEN347_1A

Our feedback on general comments by the students: The feedback results for Basic Immunology subject are significantly lower than the faculty average.

Number of students, who filled the OMHV evaluations prior to registration for the exams is 45. Number of students attending the lectures were the next:

2021.09.14: 12 persons

2021.09.21: 11 persons

2021.09.28: 13 persons

2021.10.05: 5 persons

2021. 10.12: 4 persons

2021. 10.19: 4 persons

2021.10.26: 4 persons

2021.11.02: 5 persons

2021.11.09: 3 persons

2021.11.23: 1 persons

Taken together, as approx. $\frac{3}{4}$ of students haven't attended the lectures, the result of the survey hardly reflects the real situation.

Actually the **average of on the spot (realtime after the lecture) evaluations of the lectures (K04, K05)**, were the next: **4.86** (4.70; 4.82; 4.19; 5.00; 5.00; 5.00; 5.00; 4.97; 5.00; 5.00 of 10 lectures) **compared to the result (3.80) of the general OMHV survey.**

Our feedback on specific comments on mandatory subjects:

- „hard to follow up in lecture”. Answer: In the middle of the lecture we hold 5 minutes break. We are going to continue the recordings of the lectures in the future, as we have experienced this helps a lot to study properly
- „this subject sucks for most of us. The materials are huge and the lecture slides are not good to take note of. The background is always in dark blue...and it will be much better to have explanations/notes/ or so instead of animations mostly. we don't really have time to study for it”. Answer: It's unfortunate that you feel that way. The background of some lecture slides is going to be changed to white. All the lectures are available in a voice completed version, animations follow the speed of live lecture voice. We are going to continue the recordings of the lectures in the future, as we

have experienced this helps a lot to study properly. Moreover we provided online zoom consultations on each weeks of the exam period. We provided 180 very basic pop-in questions with correct answers to help study the principles of immunology. At the exam 15 of 60 points included these pre-provided tests and 31 out of 60 points had to be obtained for a successful exam. We provided an eight weeks long examination period to take the exam.

- *„it would be better to have live lectures, even tho we have the recordings, at times it would be much more efficient to do the lectures with the same speed as the teacher”*
Answer: We follow the instructions of the Rector and the Dean and we hold the lectures with personal attendance. However we are going to continue the recordings and uploading the voice completed version of the live lectures in the future, as we have experienced this helps a lot to study properly.

Our feedback on specific comments on elective subjects:

Date:2022. 04. 20.
