

Action plan based on the students' feedback received in the 2nd semester of the 2021/2022 academic year

Department: Genetics Cell- and Immunobiology

Faculty: ED_ FOKOGEN240_1A

Our feedback on general comments by the students:

The questionnaire was submitted by 63.24% of the students, and only one („best regards”) comment was received. On most issues, the assessment of the Institute did not differ from the others. Students were satisfied with the replacement classes related to the Covid situation.

Weaknesses: Based on K3, the Department performed worse than the average of the Faculty, only 30% of the students attended the lectures.

Proposal: To increase the attendance of the lectures, the Institute will ask questions to collect points during the classes, as a bonus.

In addition to the classic examples of human genetics, we plan to present more dentist-specific examples. The general evaluation (K13) corresponds to the Faculty's average.

Our feedback on specific comments on mandatory subjects:

No written opinion was received.

Date: 30. 09. 2022
