

Action plan based on the student feedback received in the 2nd semester of the 2021/2022 academic year

Department: Genetics , Cell- and Immunobiology

Faculty: EPh Basic Immunology GYKGEN070E1A

Our feedback on general comments by the students: The feedback results/evaluation for Basic Immunology subject is considered incorrect.

In the second semester of 2021/22, our Institute announced a CV course for pharmacy students who failed the course at the end of the previous semester.

In the CV courses, we do not have lectures in the given semester.

A total of 14 students registered for the CV course in Basic Immunology GYKGEN070E1A. The number of students, who filled the OMHV evaluations prior to registration for the exams is 4.

Given that there is no lecture or internship in the CV course, the assessment given by the four students is completely meaningless and incomprehensible (See the following questions of the questionnaire: " K02 To what extent was the teaching of the subject organized? K05How much did the lectures contribute to the acquisition of the curriculum? K06How well were the exercises organized and well structured?").

In view of all this, we respectfully request the Dean to remove the OMHV evaluation of Basic Immunology from the list, and please also indicate this to the subject evaluations committee.

Date:2022. 09. 20.
